# EXECUTIVE SUMMARY

## INSIGHTS

- **Strong sales recovery:** Sales declined slightly in 2015 before rising to about $609K in 2016 and $733K in 2017.
- **West leads regional performance:** West records the highest sales and profit.
- **Consumer segment dominates:** Consumers contribute 50.56% of total sales.
- **Technology leads category performance:** Technology has the highest sales and profit.
- **Top products drive profitability:** The top 5 products generate the highest profit with Canon image CLASS 2200 Advanced copier leading at $25k.

## RISKS

- **Low Furniture profitability:** High sales with very low profit may indicate pricing, discount or cost issues.
- **Customer concentration:** Consumer account for more than half of total sales.
- **Regional performance gap:** Central and South generate considerably less sales and profit than West and East.

## OPPORTUNITIES

- **Develop weaker regions:** Target Central and South regions with focused sales campaigns and market-development initiatives.
- **Expand other segments:** Increase engagement with Corporate and Home Office customers while retaining high-value customers.
- **Improve Furniture margins:** Optimize pricing, discounts, costs and product selection.

## RECOMMENDATIONS

- **Investigate the 2015 sales decline**: Compare 2015 with 2016-2017 to identify growth drivers.
- **Prioritize high-profit Technology products:** Increase marketing focus while monitoring margins.
- **Prioritize high-profit products:** Focus marketing and sales efforts on the top 5 products.
- **Strengthen regional performance:** Investigate the causes of the gap and implement sales strategies.
- **Diversify the customer base**: Retain consumers while growing Corporate and Home Office sales.

# BUSINESS PROBLEMS, INSIGHTS AND RECOMMENDATIONS

## BUSINESS PROBLEMS

- **Furniture Profitability Gap**
Furniture has only a 2.49% profit margin, while Tables generated $206.97K in sales but -$17.73K in profit.

- **Loss-Making Products**
Tables, Bookcases and Supplies recorded negative profit, requiring product-level review.

- **Central Profitability Gap**
Central has 1,175 orders but only a 7.92% margin and $34 profit per order, below West's 14.94% and $67.

## BUSINESS INSIGHTS

- **Strong Overall Growth**
Sales increased by 46.9% and profit by 48.4%, indicating positive overall performance.

- **Technology Leads Profitable Growth**
Technology achieved the highest category margin at 17.40%, making it a key profitable-growth opportunity.

- **High Sales Do Not Guarantee Profitability**
Furniture and Tables demonstrate that strong revenue can still result in weak or negative returns.

- **West Is a Strong Regional Benchmark**
West achieves a 14.94% margin and $67 average profit per order, outperforming Central on profitability.

- **Consumer Is the Leading Profit Segment**
Consumer contributes approximately $134K in total profit, making it the largest profit-contributing segment.

## RECOMMENDATIONS

- **Review Furniture and Tables**
Evaluate pricing, costs, discounts and product mix to identify the causes of weak profitability.

- **Monitor Loss-Making Products**
Establish regular product-level reviews to support repricing, cost reduction or portfolio decisions.

- **Prioritize Technology**
Protect and selectively expand high-margin products such as Phones, Copiers and Accessories.

- **Benchmark Central Against West**
Compare product mix, pricing, customers and discounts to identify opportunities to improve Central's profitability.

- **Strengthen Discount and Customer Management**
Evaluate discounts based on their effect on profit and manage customers using both revenue and profitability.
